**Notes:**

1. Figures are rounded to the nearest million.
2. "Entire Layer Flock" data are average number of layers on hand during the month for the "Table Egg Type."
3. The UEP records produced in discovery concerning the number of hens owned by UEP-Certified producers include handwritten amendments. The table above excludes these amendments. If the UEP-Certified flock is measured based on the larger of the originally reported figures or the handwritten amendments, then the UEP-Certified flock ranged from 74.8% to 84.5% of the entire U.S. layer flock.
